VMT Receives Microsoft Gold Certified Partner Award

Alpharetta, GA., May 28, 2008 -- Virtual Management Technologies (VMT), a leading provider of managed IT services, has received the Microsoft Gold Certified Partner level award representing the highest level of competence and expertise with Microsoft technologies.

“Since our founding in 2003, VMT has focused on designing and supporting the information technology needs of small to midsize businesses, the vast majority of which use Microsoft software technologies to support their businesses,” said Steve Williams, Chief Technology Officer, Virtual Management Technologies. “Achieving the Gold Certified Partner award is truly a reflection of the satisfaction level voiced by our customers in support of their Microsoft technology initiatives. Our team focuses on technical excellence and delivers a wide variety of technology solutions to our customers ranging from Exchange implementations and Active Directory designs to virtualization and network design projects.”

The Microsoft Gold Certified Partner Award recognizes the highest level of technological excellent, marketplace impact and satisfaction of customers through Microsoft products and services.

“We look forward to continuing to meet our customers’ Microsoft technology needs and challenges,” noted Williams. “Microsoft is delivering a wide range of new technology platforms that will give our customers great flexibility in meeting their business objectives.”

About VMT

Virtual Management Technologies (VMT) provides advanced virtual data center management for midsize organizations. The company’s services help organizations manage their complex information system infrastructure including: servers, networks, email systems, security, virus management and spam, data backup and recovery, and desktop management. VMT also provides hosting, colocation and replication services. VMT’s line of document management software helps organization manage both structured and unstructured data. The company’s line of on demand business intelligence software helps midsize organizations improve the use of mission critical data.
