

VMT Managed Services for Architectural and Design Firms

Just like the structures you design, your information systems require a solid and robust foundation. In computer lingo, this is your infrastructure – an interlaced matrix of software and hardware components that when configured and managed properly can give your design teams the technology platform they need to excel.

Industry technology innovations such as shared digital building models, shared project management using the Internet, document and email management and the paperless office are re-shaping the way architectural firms are driving their businesses. Virtual Management Technologies is a managed services specialist that understands your requirements and provides a range of services to meet your IT needs. Here is an overview of the key services offered by VMT:

- **Data Center Management and Monitoring:** using advanced remote management we monitor your network environment 24/7 and proactively manage its performance, security and system updates.
- **Document and eMail Management Solutions:** through a unique relationship with Conarc®, VMT provides an advanced document management system designed for the needs of architectural and design firms.
- **Digital Data Backup and Recovery:** VMT replaces old technology tape storage systems with advanced digital storage technology that provides more secure and efficient methods of data storage and recovery.
- **Hosting and Co-Location:** the VMT data center is ready to host your applications or co-locate servers to lower your risk of disaster or losing business continuity.
- **AutoCad® Expertise:** VMT is experienced in managing AutoCad deployment across your intranet/extranet.
- **Printer/Copier Accounting and Tracking:** VMT provides the Sepialine software system designed and built by architects for architects. This system allows all prints and copiers to be captured and billed appropriately to clients.

VMT can help your firm lower total cost of computer system maintenance, improve the stability and predictability of your computer system and maximize the productivity of your IT staff – in fact, this allows your IT staff to focus on supporting the growth needs of the firm while the certified professionals of VMT manage your network infrastructure.

To learn more about how Virtual Management Technologies can help your firm manage its IT needs, please call 770-751-1110 ext. 111. Or, visit our web site at www.VMTech.net.
