

VMT Managed Services for NonProfit Organizations

Virtual Management Technologies (VMT) was founded on the principle that any business can gain the power of the most advanced IT infrastructure technologies at an affordable price. And this applies to NonProfits. We work behind the scenes to strengthen your ability to achieve your charitable and business objectives through the use of reliable and secure computer systems management.

Whether you are managing membership, tracking prospects and donors, managing volunteers, accounting for gifts and pledges, distributing emails and newsletters, planning events or building member extranets, VMT puts technology to work for you.

VMT is a managed services specialist that understands your requirements and provides a range of services to meet your IT needs. Here is an overview of the key services offered by VMT:

- **Server Management and Monitoring:** using advanced remote management we monitor your network environment 24/7 and proactively manage its performance, security and system updates.
- **Document and eMail Management Solutions:** VMT provides an advanced document management system designed for the needs of nonprofit organizations.
- **Digital Data Backup and Recovery:** VMT replaces old technology tape storage systems with advanced digital storage technology that provides more secure and efficient methods of data storage and recovery.
- **Database Administration:** VMT provides database administration and tuning for SQL/Server, Oracle and DB2.
- **Hosting and Co-Location:** VMT's data centers are ready to host your applications or collocate your servers to lower your risk of disaster or losing business continuity.

VMT can help your organization lower total cost of computer system maintenance, improve the stability and predictability of your computer system and maximize the productivity of your team. In fact, we help your IT staff focus on supporting the growth needs of the organization while the certified professionals of VMT manage your network infrastructure.
